## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 8-10, 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 2004/0030877 to Frid.
3. Regarding Claim 1, 8, 15, Frid discloses the resetting of computing system see Par. 0022 ; executing boot block code; reading bits in register storing boot code, where register indicates whether segments have been updated see Fig.2 item 33; obtaining values from table storing hashed values from previous measurement of POST/BIOS if segments of flash memory have not been updated see Fig. 2 item 34 & Fig. 3 item 345.
4. Regarding Claim 2, 9, 16, Frid discloses the transmitting of values to modules see Par. 0018-0019.
5. Regarding Claim 3, 10, 17, Frid discloses the setting control bit so that no other device can set bits read and executing POST BIOS see Par. 0031 & Par. 0035.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
7. Claim 4-7, 11-14, 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 2004/0030877 to Frid in view of US Patent 2004/0186988 to Polyudov.
8. Regarding Claim 4, 11, 18, Frid discloses performing measurement of segment storing POST BIOS that have been updated see Par. 0022 & Par. 0023. But does not disclose the performing look-up in table of previous measurements of segment updated and comparing the measured value with looked-up value. However, Polyudov discloses the
9. performing look-up in table of previous measurements of segment updated and comparing the measured value with looked-up value see Fig. 4 –6 & Par. 0038. It would be obvious to one having ordinary skill in the art at the time of the invention to include the performing look-up in table of previous measurements of segment updated and comparing the measured value with looked-up value in the invention of Frid in order to have target update of processors as taught in Polyudov see Par. 0040.
10. Regarding Claim 5-6, 12-13, 19-20, Frid discloses taking appropriate security measures when values are not equal and see resetting when they are equal see Par. 0022.

Art Unit: 2132

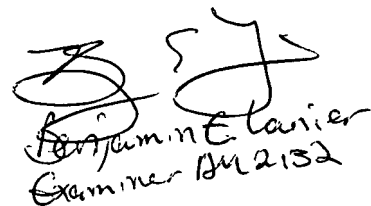

11. Regarding Claim 7, 14, 21, Frid discloses the transmitting of values to modules see Par. 0018-0019 & Fig. 3 item 341.
